

PART 1

SQLsign

computing the signature

Fact: Given $\text{End}(E_a)$ and $\text{End}(E_2)$
you can compute $\varphi_3 : E_a \rightarrow E_2$

PART 1

SQLsign

Deuring correspondence

world of supersingular curves

Equivalence
of categories

$$E \mapsto \text{End}(E) \cong \mathfrak{D}$$

world of maximal orders

computing the signature

Fact: Given $\text{End}(E_a)$ and $\text{End}(E_2)$
you can compute $\varphi_3 : E_a \rightarrow E_2$
