SETUP

- Assume parameter set q, n, m, k . and "starting" code \mathcal{C}_0
- Generate **secret key** $A \in \text{GL}_m(q)$, $B \in \text{GL}_n(q)$
- Generate **public key** $\mathcal{C}_1 = A\mathcal{C}_0B$

$$\begin{array}{c} \mathcal{C}_0 \\ \downarrow (A, B) \\ \mathcal{C}_1 \end{array}$$
