

Matrix Code Equivalence

TODO

visual of transforming a
matrix code into a 3-tensor over F_q

TODO

visual of 3-tensor isomorphism
e.g. A, B and T working on different sides
(with cool animation of the blocks?)
to transform one 3-tensor into the other

Matrix Code Equivalence

TODO

if time permits, the animation on symmetry of axes
by splicing up in several ways
(long anim!, not three separate ones!!)
